To Whom It May Concern:

On behalf of the Board of Directors of the Greater Albuquerque Chamber of Commerce, we request your support of Tax Increment Development Districts (TIDDs) for the SunCal development project.

Tax increment financing is a valuable tool that enables developers to build the up-front infrastructure that is necessary to attract new industries to our state. Now more than ever, it is imperative that the public and private sector work together to create an environment that facilitates economic growth throughout New Mexico.

SunCal's development will create a significant number of high wage jobs in technology fields such as alternative energy and high tech manufacturing, as well as increase net revenues to local and state government. This development will also stimulate additional spending on supplies and services from New Mexico companies.

Your support of this smart development mechanism will have short and long term benefits to the community and to the State of New Mexico.

Sincerely,

Don Chalmers
Chairman of the Board

Terri Cole, CCE
President and CEO
