NEW MEXICO BUILDING AND CONSTRUCTION TRADES COUNCIL

A Collective Effort on Behalf of Organized Labor

January 12, 2009

To Whom It May Concern:

The New Mexico Building and Construction Trades Council (NMBCTC) is an alliance of 16 craft labor unions within the state of New Mexico, and we support projects that benefit labor unions, contractors, and construction workers, as well as projects that enhance the state and positively affect our communities. We understand that Tax Increment Development District (TIDD) financing is a tool that will create construction jobs by attracting international companies to New Mexico. New employers in the state mean more jobs for everyone, so we support the use of TIDDs, such as the Westland Dev. Co. TIDD, in order to attract new industries and to create new job opportunities for the people of our communities.

Sincerely,

Ray M. Baca
Executive Director
